

**Power your
business with
the latest in
mono laser print
technology.**

**Professional
award-winning
mono laser
printers just
got better.**

Our most advanced mono laser technology is guaranteed to deliver quality printing every time.

Designed to deliver professional performance, with high-speed, high-quality printing you can rely on. Our latest mono laser printer range comes with up-to-date industry-standard security features and the flexibility to tailor the device to suit you and your business.

Performance engineered

With its high-speed, premium-quality printing and outstanding durability, you can be confident that your device will keep on performing to the highest standard - giving you and your business the best results, time after time.

Enterprise level scanning

With leading 2-sided scanning speeds of up to 100ipm (images per minute), physical documents are easily transformed into digital files with precision, clarity and speed.

Super-fast printing

Print large volumes of documents in the shortest time. Printing up to 50ppm (pages per minute) and a first print out time of less than 6.7 secs, you will never have a long wait for your documents to be printed.

User-friendly

Make the most of your office space with this highly productive multifunctional device. Ideal for high-volume users, this intelligent device is designed to deliver a user-friendly, professional experience with exceptional printing that your business can depend on.

Secure by design

To keep pace with the ever-evolving legislation on privacy and data security, our devices offer the latest industry-standard security features to securely protect your data.

At Brother we put print security first. All our products are 'secure as standard' - using triple-layer security at a network, device and document level, with a range of robust features that means data is only ever seen by those it is meant for.

The evolving nature of security means that our security experts continuously research new enhancements to products, solutions and services to proactively ensure all our products are secure by design.

Our professional mono laser range provides business level security verified through external security certification, offering added peace of mind that your documents remain safe and secure. All devices come with a flexible suite of security features and solutions that can be tailored to your business, enabling you to easily audit, control and manage your fleet of devices securely.

All devices come with a flexible suite of security features and solutions that can be tailored to your business

Your device protects your business by reducing its attack surface through:

Restricting user access

by using LDAPS, Windows Active Directory together with NFC authentication, only authorised users are able to access the device.

Restricting privileges at a device level

with Secure Function Lock and Setting Lock, only authorised users are permitted access to specific functions.

Maintaining device integrity

with runtime intrusion detection, Secure Boot, digitally signed firmware and end-to-end encrypted connections, devices are always performing at their optimum level of security.

Complete flexibility in how you manage, secure and control your documents.

Your network is protected with flexible industry standard features and management tools including:

Intrusion protection - with protocol management, interface restrictions and IPV4 filtering, you have the flexibility to adapt device settings to your business.

Secure connection - securely connect to enterprise level wired and wireless networks through industry standard IEEE 802.1X.

Secure encrypted communication - by using flexible industry standards such as TLS, SSH, IPSEC, HTTPS and SNMP3, your business can tailor the device to its network.

Easily manage and configure your security profile - using Device Master Settings, BRAdmin Pro 4 and Mass Deployment Tool, your business can apply settings to entire fleets of devices.

Audit your devices - using SIEM integration through Syslog, you can gather real time usage information on your devices.

Your documents are protected through encryption, storage protection and secure print solutions including:

Encrypted document transfer - when you send your print data from your computer to the device, IPPS/HTTPS encryption ensures your data is secure and unreadable.

Secure scan data transfer - whether you are scanning to your local network or over the internet via Web Connect or a cloud-based service, your data is protected using TLS, HTTPS, SFTP (SSH).

Non-persistent internal memory - all print job data is automatically wiped during a reboot and data is purged, ensuring no information is left on the device.

Secure print release - using a Brother secure print solution, documents are only released when you are ready to print and collect them.

3rd party integration - through Brother Solutions Interface (BSI), our devices can be fully integrated with trusted 3rd party partners such as PaperCut and YSoft, which adds an extra layer of security to your business.

Unlock new possibilities

Workflow Solutions

Personalised touchscreen

Improve efficiency by making frequently used functions more accessible by showing and hiding specific shortcuts. Simply log in to the device and have your individual user based shortcuts on the home screen.

Barcode printing

With Barcode Print+, simply supply your printer with the information for the barcode. The printed 2D and 3D barcode is easily read by a variety of barcode readers and scanners.

Automatically route documents

Reduce the labour-intensive task of scanning several documents, saving and renaming them. Barcode Utility means that documents with a barcode can be scanned and automatically saved to the required location, automating the separation of a batch of documents and routing each individual file to the designated folder on your network.

Security Solutions

Secure Print Release

Secure Print+ enables you to print your confidential business documents securely. Your sensitive documents are only printed when you are ready to collect them from the printer. Only authorised staff can collect their documents and users are easily added and removed.

Device Management

Remote support

Remote Panel operates in real-time, offering a complete interactive interface to your printing device. Your IT department can access the full functionality of your printer, to quickly diagnose and resolve any issues and enable settings to be changed as if they were physically standing at the printer.

You can also upgrade your devices with 3rd party solutions including integration with industry leading providers PaperCut and YSoft - giving you complete flexibility in how you manage, secure and control your documents.

Brother solutions do not come as standard on all devices. For more information on how to access these solutions please contact Brother.

Brother MPS makes printing simple for businesses.

Available as part of a managed print service (MPS) contract, each device in the range has been designed with MPS in mind.

We recognise what matters to you day-to-day. So, whatever your printing needs, we'll be 'At your side' to find the solution that simplifies printer admin, saves time, keeps costs down, and helps you stay productive:

Right Fit.

- We'll place the right print devices within reach of the right people to save on unnecessary charges, complicated use, and office space—improving overall productivity.

Experts.

- Our nationwide network of trusted authorised partners and providers ensures we always have the right expert on hand with a wide range of capabilities, experience, and like-minded values.

Straightforward.

- Fair and transparent contract terms with fixed rates, meaning no surprises. Everything you need is taken care of including deployment, training, automated consumable replenishment and recycling and account management.

Always Available.

- Comprehensive service and support, including a 24/7 New Zealand-based Helpdesk for technical support and troubleshooting, plus on-site technical service and maintenance.

Good for the Planet.

- Supporting sustainability objectives is a central part of Managed Print Services. Our commitment to sustainability helps to reduce your own environmental impact. All products on Managed Print Services hold Eco Choice Aotearoa certification.

Make the move to MPS.

Flexible and efficient

This professional mono laser range has been designed to seamlessly fit into your office space, whilst meeting the specific print requirements of your business.

Whether you need a mailbox to sort your printed documents or a staple finisher to automatically staple them together, your printer can be easily transformed to help improve business productivity.

Available for all models, optional paper trays are easily added, transforming your desktop device into a floor-standing printer, giving you the flexibility to increase the amount your business can print from the one device.
